EDUCATION

Degree	Institution	Year	CGPA/%
B.Tech (Maths & Computing)	Netaji Subhas University of Technology	2022–2026	8.25
Class XII	Shiv Vani Model Sr. Sec. School	2021	92.8%
Class X	Shiv Vani Model Sr. Sec. School	2019	90.6%

WORK EXPERIENCE

- **Software Development Extern** | AlgoUniversity | *MongoDB, Expressjs, React, Nodejs* May 2024 – July 2024
 - Implemented JWT-based authentication reducing unauthorized access by **40%**.
 - Designed low-latency compiler with CRUD functionality related to problems.
 - Deployed backend on **AWS EC2 with Docker**, improving scalability and deployment reliability.
- **Software Engineer Writer** | Ushahidi | Remote Oct 2024 – Dec 2024
 - Analyzed complex JSON-based code and authored clear, maintainable technical documentation.
 - Collaborated with an international, multilingual team across time zones, strengthening teamwork and cross-functional communication.

PROJECTS

- **E-commerce Web App** | *React, Node.js, MongoDB, Expressjs, twilio*
 - * Developed full-stack grocery web app with **React, Node.js, MongoDB**
 - * Implemented **authentication, cart management, product listings** and optimized for performance
 - * Debugged real-time rendering issues ensuring smoother UX
- **FAIR AI Resume Screening** | *FastAPI, Streamlit, Redis, XGBoost, OpenAI API*
 - * Developed a **real-time resume screening pipeline** using FastAPI, Redis Streams, and an XGBoost model with LLM-based PDF summarization via OpenAI API.
 - * Built a feature-rich **Streamlit dashboard** with advanced analytics — including violin plots and heatmaps — for visualizing candidate patterns.
 - * Enhanced automation for candidate ranking and summary generation, reducing manual evaluation time by **40%**.
- **Stock Headlines Analysis** | *Python, TinyML*
 - * Built TinyML-based sentiment analyzer with **>85% accuracy**, optimized for real-time deployment
 - * Applied debugging and performance testing to reduce inference time under **200ms**
 - * Integrated live stock market API for fetching real-time financial headlines and immediate prediction
 - * Implemented visualization dashboards to track sentiment trends against market fluctuations
 - * Enhanced portability by compressing model size, making it deployable on edge devices

ACHIEVEMENTS

- ICPC Chennai Regionalist – **Ranked 1** among NSUT teams in intra-college coding contest (ICPC prelims)
- Secured **All India Rank 62** in ICPC Regional Contest (2025), competing against top teams from IITs, NITs.
- National **Semi-Finalist** in Flipkart GRiD 7.0 (2025) among top teams across India.
- Solved **1200+ DSA** problems on Codeforces, LeetCode, and CSES
- **Specialist** on Codeforces (Max rating: 1557)
- Ranked **top 1.5% (14/1200+)** in Graph Contest by AlgoUniversity
- **Semi-finalist** at INNOHACKS Hackathon as team leader

TECHNICAL SKILLS

- **Programming:** C++, JavaScript, Python | **Development:** React.js, Node.js, MongoDB, Git, Docker, AWS
